Author Radana Kuny works as a behaviour therapist for dogs and an energy coach for humans.

In her book „Die Shanti-Methode“ she gives practical advice for teaching, working and living with a human’s best friend on four paws: It’s all about the inner strength and understanding, that you face your dog with. The base for a harmonic human-dog-relationship lies in the human that interacts with their dog and the way they do. And understanding the behaviour and mannerisms of your dog is critical for the right interaction. That’s why this book is both a training book and a vocabulary for learning how to „speak Dog“ and understand what your best friend needs and communicates with you.

„Die Shanti-Methode“ is one of our bestselling titles and is still ordered regularly even more than four years after it’s first publication.

If I walk a conscious path with the angels around the year, then it’s the Twelfthtide, the twelve nights between Christmas Eve and Epiphany, in which the influence of the Archangels reveals itself. It’s the time of year in which the doors to the spiritual world are completely open and the destiny of the earth-human is woven. A time in which the Archangels and the elemental guardians of the worlds in between take us to school, a school of creation.

Author Ines Siri Trost invites the reader to work with them, to use the Twelfthtide and embrace them as a time of spiritual healing and happiness.

Psychologist Dr. Viktor Terpeluk determined that the personal process of maturing of every human is an unfolding of their internal, divine love. This maturing is not a process of enlightenment (though it can be) but rather of getting over problematic character traits that can be described by the term „selfishness“. Based on experiences from beyond the author explains ways to act upon this fact in psychotherapy, in daily life and in education. Not only does he present answers that are informed by theory to relevant questions of meaning in life. But also practical approaches to reach such experiences of divine love through the opening of the heart.
